UI Structure

Select an action or sermon with OK. Player Back/RETURN restores Home and prior focus.

Errors remain on the relevant screen: Retry for playback; Refresh for the catalog.

Exit confirmation: Stay returns Home; Exit App closes the application.

Use Cases

Main use cases

- Watch the public live HLS stream when a broadcast is available.
- Browse the public sermon catalog and play an archived MP4 sermon.
- Read church branding, website and Central Time service schedule on Home.
- Use TV remote arrows/OK, Return and media controls.
- Recover from unavailable streams, catalog failures and empty catalogs.
- Confirm application exit from Home.

Access: free; no login, subscription, purchasing or test credentials.

Use Cases — Watch Live

1. On Home, focus Watch Live and press OK.
2. The full-screen player connects to the public HLS broadcast.
3. On a Samsung TV the app uses native AVPlay; browser previews use HTML video/HLS.js.
4. Use Play/Pause or the on-screen button. Live rewind/forward controls are disabled.
5. If the stream is offline or fails, read the status message and choose Retry.
6. Choose Back to Home or press RETURN to close playback and restore prior focus.

Stream: https://live.irvingcollege.church/hls/stream.m3u8

Broadcast availability is not guaranteed outside church services. No successful physical-TV playback is claimed in this document.

Use Cases — Browse Sermons

1. On Home select Browse Sermons; focus moves to the first available sermon (or Refresh for an empty catalog).

2. Use arrows to select a sermon card; press OK to open its archived MP4.

3. In the player use Play/Pause, −30 seconds and +30 seconds. Dedicated media keys provide the same functions.

4. RETURN / Back to Home closes the player and restores the selected sermon.

5. Refresh requests the public catalog again. An empty list has a clear message; network/format errors explain recovery.

Catalog: https://live.irvingcollege.church/sermons/catalog.json

No test account is required. Catalog titles and dates are provided by the church server.

Use Cases — Access, Errors and Exit

No login or in-app purchase

All content is publicly accessible. No account/password, payment, subscription, advertisement or purchase flow is implemented.

Network recovery

Loading and unavailable-stream messages appear in the player. Retry reconnects the selected video. The catalog provides Refresh and distinct empty/error messages. No fake replacement videos are shown.

Exit and background behavior

RETURN closes playback, returns from archive scrolling to Home, or opens the Home exit confirmation. Stay dismisses the confirmation; Exit App exits. Hidden playback is paused. The platform EXIT key remains under Samsung system behavior.

Use Cases

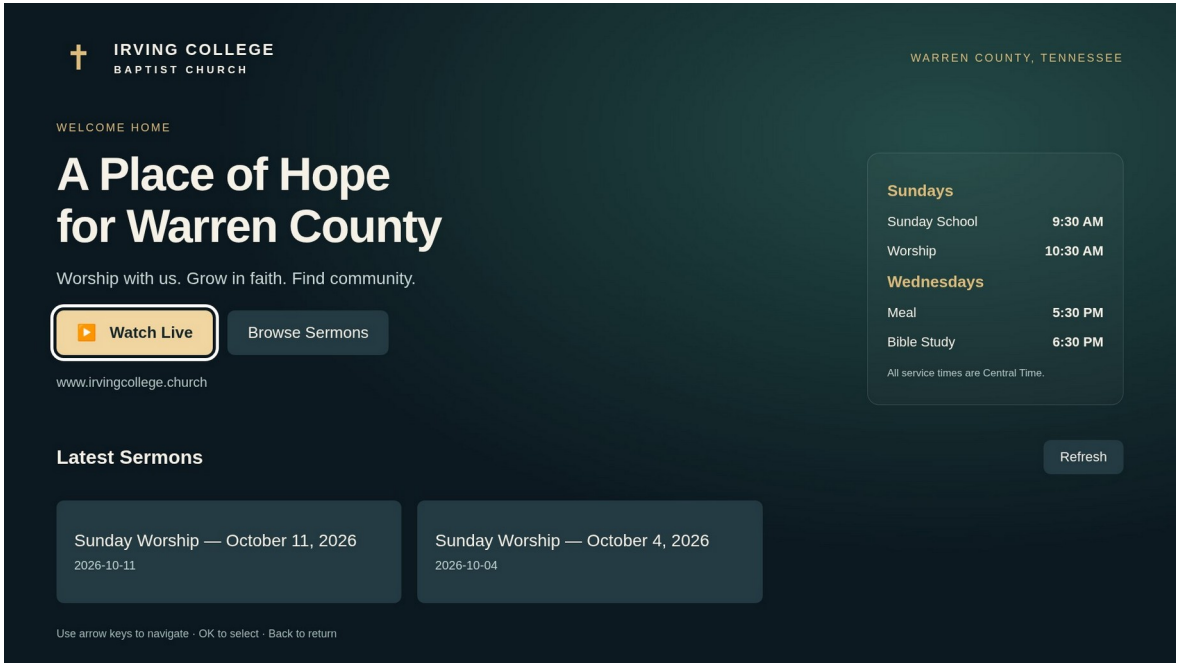

Menus and Functions — App preview images

Remote Control Keys

Language Options

Menus and Functions

1.- App preview images — Home

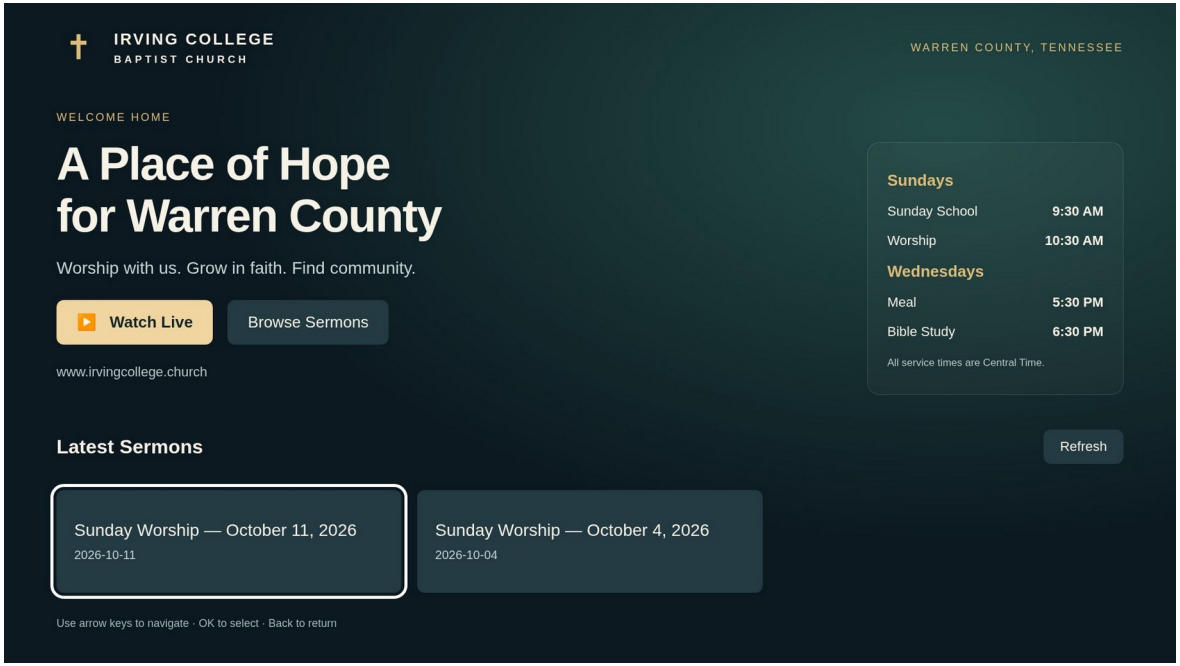

UI element	Function
Watch Live	Open live player
Browse Sermons	Focus archive
Service times	Central Time
Refresh	Reload catalog
Sermon card	Open MP4

Genuine Chromium rendering of the app. Existing app artwork is shown unchanged. Catalog content is the real church response captured on 2026-10-13; this is not a physical-TV photograph.

Menus and Functions

App preview images — Sermon browsing

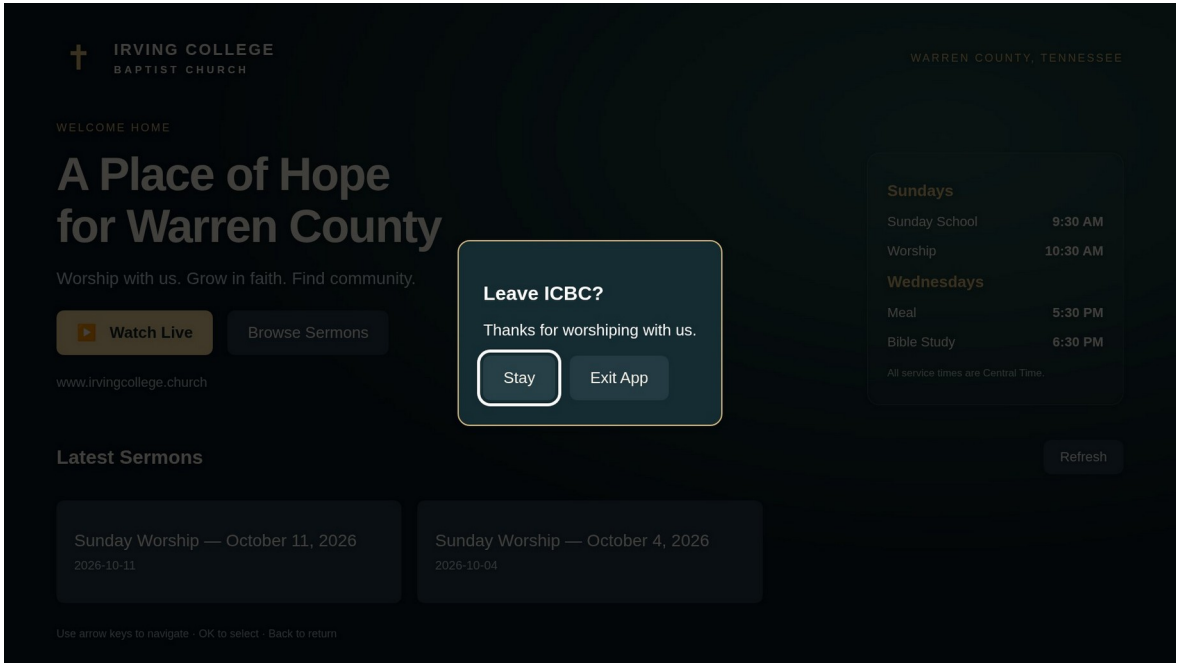

UI element	Function
White outline	Current focus
Title / date	Catalog metadata
Sermon card	OK starts video
Arrows	Move focus
Refresh	Retry catalog

Genuine app screenshot: archive focus state. No fabricated sermon records or video imagery. Browser capture used unmodified app files and unchanged real catalog bytes through the capture harness.

Menus and Functions

App preview images — Exit confirmation

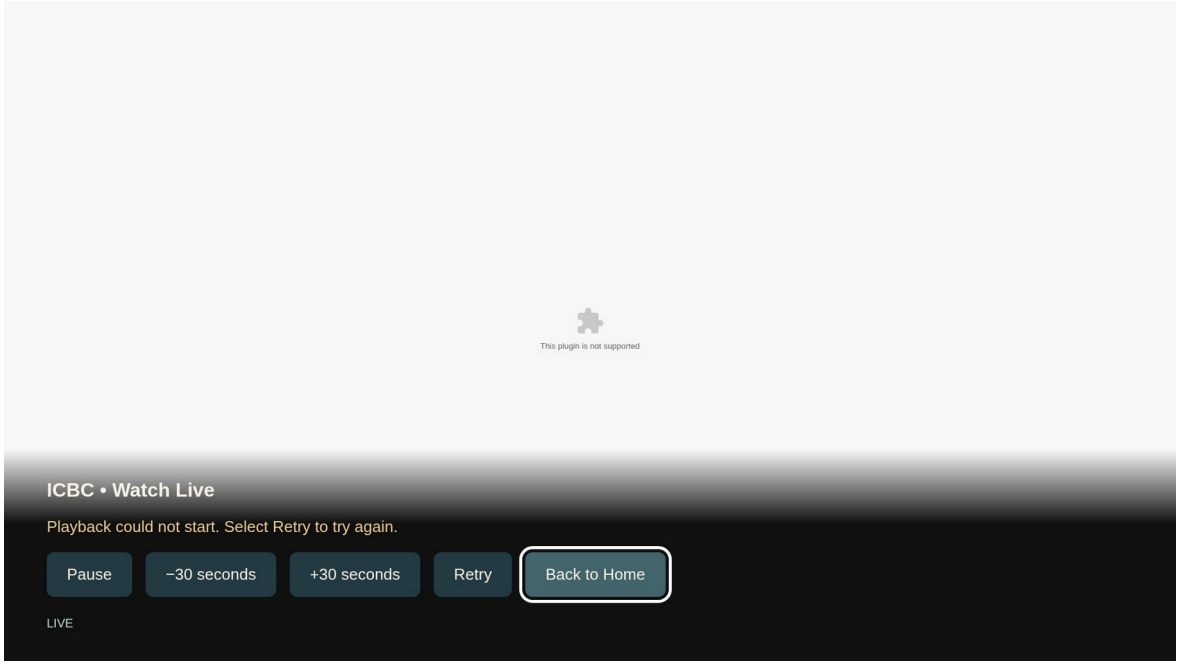

UI element	Function
Stay	Return to Home
Exit App	Close app
RETURN	Dismiss dialog
Arrows / OK	Choose / activate

Genuine browser-rendered exit dialog from the app. No login or payment is required. This screen is reached with RETURN from Home.

Menus and Functions

App preview images — Player and network recovery

UI element	Function
Pause / Play	Toggle playback
−30 / +30 sec	Archive seek only
Retry	Reconnect video
Back to Home	Stop / return
Status text	Connection/error

Genuine browser capture of the player’s playback-error state on 2026-10-18. No successful playback or video frame is fabricated. Samsung AVPlay, live broadcast availability and physical-TV playback remain unverified.

Remote Control Keys

Language Options

Remote Control Keys

RETURN: closes player/restores focus; on Home, opens exit confirmation.

EXIT: platform-defined behavior; the app does not register or override this key.

Key	Action	Remarks
RETURN	Move to previous page. Game applications must show a confirmation popup.	Mandatory. Do not modify.
EXIT	Close the application and show the TV broadcast channel. Game applications must show a confirmation popup.	Mandatory. Do not modify.
ENTER / OK	Activate the focused button or sermon	No full-screen toggle mapping
UP/DOWN/LEFT/ RIGHT	Move focus between visible controls	Scroll selected archive item into view
PLAY / PAUSE / PLAY-PAUSE	Control active video	Registered optional media keys
STOP	Close player and return Home	While playing
REWIND / FAST FORWARD	Seek −30 / +30 seconds	Archived content only
CHANNEL / VOLUME / COLORS	No custom app mapping	System behavior retained
